

Scumfree

Professional Window Cleaning Concentrate

Scumfree Professional Window Cleaning Concentrate is engineered to effectively clean windows protected by the glass defender series on multi-story buildings. This product does not leave an oily residue behind, which prevents dust and dirt from adhering to architectural surfaces. Scumfree is a safer alternative to dishwashing detergents currently used in the window cleaning industry.

Description

This product is a biodegradable, specifically formulated window cleaning additive for use with a brush and squeegee. This product was designed by professional window cleaners and chemists for superior results. Scumfree removes surface contamination such as oil, soap scum, dust, dirt, minerals, such as silicates, calcium, lime, silica, magnesium, and many other commonly found contaminants from glass surfaces. Scumfree dries to a powder, unlike other oily surfactant products that are actually the cause of stains on glass.

Scumfree effectively cleans glass surfaces without damaging **Glass Defender** protective coatings.

REVOLUTIONIZING THE BUILDING MAINTENANCE INDUSTRY

Specifications

Advantages

- Specifically designed for professional high-rise window cleaning
- Leaves no oily residue
- Dries to a powder
- Helps keep windows cleaner for longer
- Won't jeopardize warranties for protective coatings on adjacent surfaces
- Won't damage glass, metal or stone protective coatings
- Safer than industry standard options
- Environmentally friendly
- Safe for glass, metal and stone surfaces
- Biodegradable

Intended Use

This product is not intended for blow and go window cleaning, but for careful cleaning of glass surfaces protected by our **Glass Defender** protective coatings.

Dilution

Vary concentration depending on surface conditions. Avoid using excessive amounts of product. In some instances, when glass is protected by Glass Defender, only deionized water is needed.

Application

We recommend using this product with deionized water and clean window cleaning tools. Add Scumfree to a 5-gallon bucket of water, and apply the mixture to the glass with a window cleaning brush.

Scrub the window to loosen all surface contamination. Use a squeegee with a new, sharp rubber blade to remove the solution from the glass surface before it dries. When possible, place your brush horizontally underneath the squeegee to catch and contain excess mixture in the brush. Use a microfiber towel to remove excess mixture from the edges of the window, the window frames and any adjacent surfaces. Scumfree is designed to not cause staining; how-

ever, we recommend capturing as much dirty, soapy mixture as possible, in order to prevent the mixture from running down the structure's facade.

Precautions

Even though this product is designed to be an employee-safe alternative, we recommended limiting bodily contact with any cleaning product. This material dries white. It is important to remove excess material; any residue left behind will be noticeable, especially on dark surfaces.

Warranties

The information provided by Presto for the safe and effective use of this product, and all of our products, is believed to be good and accurate. However, due to the many different possible applications of this product, careful considerations should be made when selecting its suitability for each surface.

The information provided should never be substituted for individual testing to ensure the product's compatibility with each surface intended for use. The purchaser shall assume all responsibility for determining the suitability of this product. When used as intended, this product will perform as stated. No other warranty can be made for this product, verbally or written.

Presto warrants this product to be free from defects. In the event this product is found to be defective, we will provide a sufficient amount of product to replace the defective product.

Microfiber Towels

Green Synergy Product

Presto's Green Synergy Products work synergistically with each other to protect all surfaces of a building without damaging Presto's protective coatings present on those surfaces. These products are designed to be the longest lasting protection available for preserving the appearance of buildings.

Green Synergy Products are designed so that they will not easily break down and leach degrading materials onto adjacent surfaces.

Green Synergy Products work to save you money. Listed on our website is a 10-year Return on Investment graph that depicts the long-term cost savings associated with using Presto's Green Synergy Products compared to competitive options that utilize older technology. About Presto

Presto Restoration Products was created to implement higher performing technology, safer practices and products that provide a better return on investment to the building restoration and maintenance industry. Our expertise is researching and developing products and techniques to restore and preserve the magnificence of high-rise buildings built with architectural glass, metal and stone surfaces.

At Presto, we have mastered the art of balancing quality and compliance through our dedication to Building Product Synergy for a safer, greener environment.

Presto continues to perform extensive research, development and testing on various methods of commercial exterior restoration and preservation.

Presto strives to design products that comply with the Green Building Standards Act, which promotes better environmental standards for the construction, rehabilitation and maintenance of buildings:

- Improve energy efficiency and increase generation of energy through renewable and clean energy technologies
- Increase the demand for environmentally preferable building materials, finishes and furnishings
- Improve the environment by decreasing the discharge of pollutants from buildings
- Create industry and public awareness of new technologies that can improve the quality of life for building occupants
- Improve the health and productivity of building occupants by meeting advanced criteria for indoor environmental quality
