

Stone Restore PS

Polished Stone Stain Remover Cream

Stone Restore PS is a restorative cream that safely removes waterproofing overspray, soap scum, lime, calcium and other unwanted stains from polished stone surfaces.

Description

This product is specially formulated to safely and efficiently remove stains from polished stone without the use of machinery that are caused by soap scum, sealer and repellant overspray, caulking residue, calcium and lime buildup and more.

REVOLUTIONIZING THE BUILDING MAINTENANCE INDUSTRY

Specifications

Advantages

- Safe on sensitive stone
- Environmentally friendly
- Removes soap scum
- Removes mineral deposits
- Removes waterproofing overspray
- Fights grease and grime
- No harsh abrasives
- Acid-free
- Water-based
- Cost-effective
- Non-greasy
- Easy to use

Horizontal or Vertical

This product is suitable for use on horizontal or vertical polished stone surfaces.

Intended Use

This product is formulated for use on polished stone surfaces only and not rough surfaces.

Coverage Rates

1,000 to 1,500 sq. ft. per gal. depending on level of staining

Necessary Equipment

- Protective gear
- White, synthetic, non-abrasive pad
- Absorbent rag or towel

Surface Preparation

Surface must be cleaned to remove any dirt or sand that may scratch the polished stone. It is extremely important that the application pad or rag used with this product is never contaminated with these or other types of harmful abrasives. Always test in a small, inconspicuous area prior to use to ensure no scratching or undesirable effects are caused.

Application

Apply with either a clean, dry window cleaning rag or a white, synthetic, non-abrasive pad. Rub the surface in a circular motion until the stain is removed, wiping away any excess product.

If the surface of the stone is dark and white pigments from this product are noticeable in the pores of the stone, use a pressure washer or spray bottle to remove the excess material from the pores of the stone. Do not use shoe polish or any other dark filler as these materials easily break down and cause staining on building surfaces. Follow the same instructions for each application.

Presto's Stone Cleaning Line

Situations including various stone types or different natured stains may require multiple products. Presto's stone cleaning line includes:

- **Stone Restore HD** - For difficult to remove mineral stains caused by efflorescence, rusting, red clay, iron and more.
- **Stone Restore CB2** - For difficult to remove biological stains

Precautions

If product is allowed to dry out and become dusty, appropriate respiratory protection must be used. This product may cause minor scratching when used in conjunction with a polisher or abrasive pad.

Recommendations

We recommend the use of Presto's protective treatment **Leach Stop** (a mineral leaching mitigation treatment), to protect the newly restored surface for years.

Stone Restore PS Suitability Sheet

Substrate	Type	Polished	Rough	H	V	Coverage Rates
Architectural Materials	Concrete	No	No	No	No	1k to 1.5k sq. ft.

Green Synergy Product

Presto's Green Synergy Products work synergistically with each other to protect all surfaces of a building without damaging Presto's protective coatings. These products are designed to be the longest lasting protection available for preserving the appearance of buildings.

Green Synergy Products are designed so that they will not easily break down and leach degrading materials onto adjacent surfaces.

Green Synergy Products work to save you money. Our website features a 10-year Return on Investment graph comparing Presto's products against competitive options. More info: [Click Here](#)

About Presto

Presto Restoration Products was created to implement higher performing technology, safer practices and products that provide a better return on investment to the building restoration and maintenance industry. Our expertise is researching and developing products and techniques to restore and preserve the magnificence of high-rise buildings built with architectural glass, metal and stone surfaces.

Presto strives to design products that comply with the Green Building Standards Act, which promotes better environmental standards for construction, rehabilitation and maintenance of buildings:

- Improve energy efficiency and increase generation of energy through renewable and clean energy technologies
- Increase the demand for environmentally preferable building materials, finishes and furnishings
- Improve the environment by decreasing the discharge of pollutants from buildings
- Create industry and public awareness of new technologies that can improve quality of life for building occupants
- Improve the health and productivity of building occupants by meeting advanced criteria for indoor environmental quality

At Presto, we have mastered the art of balancing quality and compliance through our dedication to Building Product Synergy for a safer, greener environment.

Presto continues to perform extensive research, development and testing on various methods of commercial exterior restoration and preservation.
